BioTalk with Rich Bendis Podcast

La Petite Noiseuse Productions Co-Founder and Chief Science and Art Officer Monica Lopez, PhD joins Rich Bendis on BioTalk

Published: Monday, October 15, 2018

La Petite Noiseuse Productions Co-Founder and Executive Scientific & Artistic Director Monica Lopez, Ph.D. joins BioTalk Host Rich Bendis to discuss her career path, their consulting services, science-art integration, multidisciplinary thinking and doing in healthcare, and STEM-STEAMM education for workplace challenges of the future.

Dr. Lopez is a multilingual cognitive scientist, educator, entrepreneur, multidisciplinary artist, public speaker, and writer. At her company, Dr. Lopez leads a unique R&D program within creativity and human intelligence with the goal of advancing artificial intelligence. The result has been a novel model that merges the cognitive brain sciences with the arts, and forms the basis of the company's consulting services in different industries (healthcare, autonomous systems, education, entertainment, and cyber) with clients from Boston, New York, and San Francisco and Europe (France, Belgium, Austria, United Kingdom, Italy, and Germany). To prepare leaders for the challenges of tomorrow, Dr. Lopez has created since 2009, as faculty at Johns Hopkins University and Peabody Institute, a STEAMM education platform. Prior to co-founding her company, she worked in business development, product evaluation, marketing, communications, and strategic partnering in various languages. Dr. Lopez is a frequent keynote and plenary speaker and panelist at international and national venues. She holds BA degrees in Psychology and French, and a MA and PhD in Cognitive Science, all from Johns Hopkins University, a Certificate of Art in Photography from Maryland Institute College of Art, and was a postdoctoral fellow at The Johns Hopkins University School of Medicine. Dr. Lopez has been recognized as a "particularly imaginative polymath" by the Imagination Institute of the University of Pennsylvania's Positive Psychology Center. She has been a Salzburg Global Seminar Fellow and distinguished guest with their Board of Directors.
